# Content

<b>1 What is biotechnology? .....</b>	1
<b>1.1 Terms and definitions .....</b>	3
1.1.1 The term biotechnology: from pigs to microbes.....	5
1.1.2 Biotechnology as usage of biological structures, functions and processes .....	5
1.1.3 Biotechnology or biotechniques? And what is bionics?.....	6
1.1.4 Classical definitions on biotechnology .....	7
1.1.5 Genetics, gene technology and molecular biology as parts of biotechnology and biology.....	8
<b>1.2 Milestones in biosciences and biotechnology .....</b>	11
1.2.1 Mid of 17 <sup>th</sup> to mid of 20 <sup>th</sup> century: the first 300 years .....	12
1.2.2 Mid of 1940ies to mid of 1960ies: 20 years for the molecular basis accompanied by usage of classical biotechnology.....	15
1.2.3 Mid of 1960ies to beginning of 1980ies: 15 years for the basics of genetic engineering and first commercial applications .....	18
1.2.4 The 1980ies to 2000: additional 20 years to decipher the human genome .....	20
1.2.5 Post—2000: scientific developments since the new millennium .....	24
1.2.6 Summary: characterization of the “new” biotechnology.....	27
References .....	29

## **Part I The biotechnology industry: development, status quo as well as applying sectors and markets**

<b>2 Biotech industry from the beginnings to today and in the future .....</b>	33
2.1 General framework for the development of the biotech industry .....	35
2.1.1 Research and teaching in „new“ biology.....	35
2.1.2 The political, social and economic framework.....	39
2.1.2.1 The framework in the US, the pioneer in “new” biotechnology .....	39
2.1.2.2 The situation in Japan and Europe .....	44
<b>2.2 Genentech &amp; Co.: The raise of the biotech industry in the US.....</b>	48
2.2.1 Beginnings in 1976: the success story of Genentech .....	49
2.2.2 Additional pioneers with strong development: Biogen, Amgen, Genzyme .....	52
2.2.2.1 Biogen, an early transatlantic company .....	52
2.2.2.2 Amgen, until 2013 the leading company with regard to revenues.....	53
2.2.2.3 Genzyme, with focus on rare diseases .....	55
2.2.3 1976 to 1980: the first 5 years US biotech industry .....	56

2.2.4 The 1980ies: first boom and breakthroughs .....	56
2.2.5 The 1990ies: completely new drugs.....	60
2.2.5.1 Companies, financing and transactions in the 1990ies .....	65
2.2.5.2 New drugs cause the positive development and lead to a boom of the capital markets.....	69
2.2.6 The first decade of the new millennium: from capital markets hype to profitability.....	70
2.2.6.1 Again, new drugs cause positive developments .....	74
2.2.6.2 Financing, transactions and revenues reach new heights .....	78
2.2.6.3 2008 delivers the first break-even, the decade ends with the financial crisis .....	83
2.2.7 The developments since 2010: capital markets are “exploding” .....	86
2.2.7.1 IPO-fireworks as well as continued strong financing and partnering .....	90
2.2.7.2 Biotech-Know-how again looked for with regard to transactions .....	95
2.2.7.3 Strong fundamental development: increasing revenues and market capitalization based on increasing success of biotech drugs .....	97
2.2.7.4 Additional approvals strengthen the ongoing success of biotech drugs .....	102
2.2.8 Summing up the development of the US biotech industry: early start, excellent financing conditions and a dozen of leading companies .....	106
<b>2.3 Companies with biotech activities actually exist since about 100 years .....</b>	<b>114</b>
2.3.1 Biotechnology for drug and diagnostics development .....	119
2.3.2 First activities of established companies in the „new“ biotechnology .....	121
<b>2.4. Who today is the biotech industry? .....</b>	<b>127</b>
2.4.1 The borders between biotech and pharma are blurring.....	131
2.4.2 The biologisation of the industry: will also the borders between biotech and chemical or other industry become indistinct? .....	134
2.4.3 Biotechnology as cross-sectional and future technology.....	136
2.4.3.1 Biotechnology as sixth phase of the Kondratieff cycles .....	137
References .....	138
<b>3 Applying sectors and markets of biotechnology .....</b>	<b>143</b>
<b>3.1 Red biotechnology: biopharmaceutical and diagnostics industry .....</b>	<b>145</b>
3.1.1 (Bio-)Pharmaceuticals: biological know—how for drug development .....	145
3.1.1.1 Biotech drugs outstrip conventional drugs .....	148
3.1.1.2 Additional biopharmaceuticals in the queue .....	161
3.1.1.3 Exkursus: drug development is highly risky, takes long time and is accordingly costly .....	167
3.1.1.4 Biosimilars: copied biologicals are entering the market .....	192
3.1.1.5 Summing up: biosimilars and biopharmaceuticals.....	205
3.1.2 Therapeutic trends: immuno therapies, gene therapies, personalized medicine .....	213

3.1.2.1 Immuno oncology: empowering the own immune system .....	213
3.1.2.2 Gene therapies: erase defects forever .....	223
3.1.2.3 Personalized medicine: drugs fitting to type.....	227
3.1.3 (Molecular-)Diagnostics.....	236
3.1.3.1 IVD, MDx, PGx, CDx, Biomarker & Co. — What is what? .....	238
3.1.3.2 PGx: ask your genes about risks and adverse effects.....	244
3.1.3.3 Companion diagnostics (CDx): therapy and diagnostics in a tandem .....	247
3.1.3.4 MDx, CDx, biomarker and biomarker based medicine: Quo vadis?.....	249
<b>3.2 White biotechnology: industrial, especially chemical production.....</b>	<b>254</b>
3.2.1 Sector with the longest tradition of biotechnological applications .....	255
3.2.2 Processes and products .....	256
3.2.3 Basic chemicals (bulk chemicals) and (bio)polymers .....	258
3.2.3.1 Naturally available biopolymers.....	259
3.2.3.2 Bioplastics on the advance .....	261
3.2.3.3 Additional biopolymers: fats and oils, silk proteins .....	262
3.2.3.4 Biofuels: possible without competition to agriculture.....	264
3.2.4 Specialty chemicals (fine chemicals) .....	276
3.2.4.1 Amino acids .....	277
3.2.4.2 Vitamines.....	279
3.2.4.3 Enzymes.....	280
3.2.4.4 Additional specialty chemicals .....	282
3.2.5 Market forecasts and companies within white biotechnology .....	283
3.2.6 Concluding assessment of white biotechnology .....	288
3.3 Additional sectors.....	291
3.3.1 Green biotechnology: agriculture.....	292
3.3.2 Grey biotechnology: environment protection .....	297
3.3.3 Supplier, service provider, technology and tools provider .....	297
References .....	301

## **Part II The biotech industry: the situation in Germany**

<b>4 General framework for the development of the biotech industry in Germany .....</b>	<b>313</b>
<b>4.1 Research and teaching before the 1970ies .....</b>	<b>315</b>
4.1.1 Until 1950: the initial situation in Germany .....	315
4.1.2 1956, building German molecular biology: the Institute for Genetics in Cologne and other institutes .....	317

4.1.3 Concluding assessment of the German development: from a biochemical pioneer to a follower in molecular biology .....	321
<b>4.2 Evaluation of the German competitiveness in the „old“ biotechnology .....</b>	<b>323</b>
<b>4.3 The efforts and catching up in the 1970ies to 1990ies .....</b>	<b>325</b>
4.3.1 End of 1960ies and the 1970ies: first support programs and studies.....	326
4.3.2 The 1980ies: »Hoechst—signal«, gene centers, enquete-commission and political fronts .....	331
4.3.3 The 1990ies: reunion, genetic engineering act, aid money, BioRegio and other contests .....	336
<b>4.4 Company foundation and financing as specific challenges in Germany, then and today .....</b>	<b>343</b>
<b>4.5 Germany versus US: a summarizing comparison of early biotech-related frameworks.....</b>	<b>349</b>
<b>4.6 Early biotech and genetic engineering activities of established firms.....</b>	<b>351</b>
4.6.1 Development at selected chemical groups .....	351
4.6.1.1 Hoechst AG (today Sanofi).....	353
4.6.1.2 Bayer.....	355
4.6.1.3 BASF .....	356
4.6.1.4 Henkel .....	357
4.6.2 Biotech and genetic engineering at selected pharmaceutical companies.....	357
4.6.2.1 Boehringer Mannheim .....	358
4.6.2.2 Boehringer Ingelheim .....	358
4.6.2.3 Merck.....	359
4.6.2.4 Merz Pharma .....	359
4.6.2.5 Pharma and biosimilars .....	359
References .....	360
<b>5 Emerging of a small and medium sized biotech industry in Germany .....</b>	<b>363</b>
<b>5.1 Biotech desert before 1996: few, but not poor foundations .....</b>	<b>365</b>
5.1.1 Challenge biotech startup in drug development.....	371
5.1.2 The inceptions from the first half of the 1990ies .....	372
<b>5.2 The first 15 years: boom, hype, downswing, ray of hope, stagnation .....</b>	<b>372</b>
5.2.1 1996 to 2001: the boom ends with a hype, the bubble bursts .....	376
5.2.1.1 Capital markets explode and investors finance despite questionable fundamental data.....	377
5.2.1.2 Due to possible exits venture capital was highly available .....	379
5.2.1.3 Status quo end of 2001 .....	380
5.2.2 2002 to 2004: PerAspera AdAstra .....	382
5.2.2.1 Financing at the bottom, since 2004 slow recovery.....	383
5.2.2.2 The industry experienced a hard shake up .....	383

5.2.2.3 A resumee on the year 2004 .....	385
5.2.3 2005 to 2007: Back to the future and with slight confidence on a good track .....	387
5.2.3.1 One approval and two candidates just before .....	387
5.2.3.2 Mixed picture regarding financing .....	388
5.2.3.3 Deals increasingly support financing.....	391
5.2.3.4 Resumee for "Back to the future".....	392
5.2.3.5 Eligible framework would be necessary .....	395
5.2.4 2008 to 2011: on course although facing hurdles - pitfall financing? .....	395
5.2.4.1 Again ups and downs regarding financing.....	396
5.2.4.2 Once more strategic alliances support financing .....	401
5.2.4.3 Finish and hurdles also regarding product developments .....	401
5.2.4.4 Positive news and good developments trigger acquisitions .....	406
5.2.4.5 Status quo end of 2011: on course or pitfall financing? .....	408
5.2.5. Supporting activities by the federal public.....	410
5.2.5.1 Hightech strategy for Germany .....	412
5.2.5.2 Life Sciences are a research focus of the BMBF .....	413
<b>5.3 Latest development in the industry: from stagnation to new opportunities.....</b>	<b>418</b>
5.3.1 Key data: stagnation instead of growth .....	418
5.3.1.1 R&D investments and the question how to finance them .....	418
5.3.1.2 Company and employee count stay stable, that is stagnate .....	420
5.3.1.3 Revenues: although increasing constantly over the last 15 years, since 2007 only on a moderate level.....	421
5.3.2 Financing: should be better, single cases not too bad .....	422
5.3.2.1 Financing of private biotech companies since 2012 .....	424
5.3.2.2 Financing of public biotech companies since 2012 .....	425
5.3.3 New alliances: new opportunities? .....	426
5.3.4 Drug pipeline: new opportunities! .....	426
<b>5.4 Take up the cudgels: on the way to the 20th birthday — and slowly on the way to test of maturity.....</b>	<b>427</b>
5.4.1 Early development of the US biotech industry versus today's impact.....	430
5.4.2 Why does the German biotech industry stands where it stands today? .....	432
5.4.3 A different view on medical biotechnology in Germany.....	434
5.4.4 Perception and trust by investors, politicians and the general public are on the wish list .....	435
References .....	437

Tab. 2.38 Kondratieff cycles of economic development.....	138
Tab. 3.1 Overview on characteristics of classical pharmaceuticals versus biopharmaceuticals.....	151
Tab. 3.2 Responsibilities of different departments in the Food and Drug Administration (FDA; after reorganisation 2004) .....	153
Tab. 3.3 FDA approvals of innovative drugs since 2000: bio versus non-bio .....	153
Tab. 3.4 Approved innovative drugs with FDA breakthrough status (dated end of 2014) .....	158
Tab. 3.5 Top-20 drugs by revenues (US\$ bn), 2010 and 2020.....	160
Tab. 3.6 Top-20 drugs by revenues in the year 2014 and comparison with prior years .....	162
Tab. 3.7 Average duration (years) of clinical and approval phase by indication .....	170
Tab. 3.8 Acceleration of approval by the new FDA breakthrough status .....	172
Tab. 3.9 Calculation of costs for a biopharmaceutical according to Tufts University .....	177
Tab. 3.10 Selected data on costs of drug development according to Tufts University.....	177
Tab. 3.11 Specifications of different phases of drug development according to the Office of Health Economics (OHE) .....	178
Tab. 3.12 Specifications of different phases of drug development according to Paul et al. (2010) .....	179
Tab. 3.13 Capitalized NME costs of the single phases by different success rates.....	179
Tab. 3.14 Impact of success rate and interest rate on capitalized NME costs according to DiMasi et al. (1991) .....	181
Tab. 3.15 Capitalized NME costs (US\$ mio) in selected indications according to Adams and Brantner (2006) .....	181
Tab. 3.16 R&D costs per NME resp. per new biological according to PricewaterhouseCoopers (PwC) and EvaluatePharma ( EVP), 2002 to 2013.....	185
Tab. 3.17 Member and associated companies of the US association PhRMA (dated: July 2015) .....	185
Tab. 3.18 Direct costs of clinical phases of drug development by indication .....	189
Tab. 3.19 Direct costs per patient per phase of drug development, 2011 .....	190
Tab. 3.20 Off-patent biologicals and their biosimilars, European approvals .....	193
Tab. 3.21 Selected companies and their biosimilars in the pipeline by phase .....	203
Tab. 3.22 Publicly announced biosimilars studies at Sandoz .....	205
Tab. 3.23 Biotech blockbuster, revenues in 2014 .....	209

Tab. 3.24 Parts involved in immune defense .....	211
Tab. 3.25 Strategies to empower the immune system to fight cancer .....	215
Tab. 3.26 Compounds in development aiming to co-inhibitory T-cell receptors (immune checkpoints)...	218
Tab. 3.27 Compounds in development aiming to co-stimulatory T-cell receptors.....	218
Tab. 3.28 Selected bi- and trispecific cancer antibodies in R&D .....	220
Tab. 3.29 Selected R&D projects in adoptive T-cell therapy .....	224
Tab. 3.30 Selected biotech companies with activities in gene therapy .....	227
Tab. 3.31 Technical progresses since the beginnings of the human genome project (HGP).....	230
Tab. 3.32 Number of drugs with pharmacogenetic label by biomarker and indication .....	234
Tab. 3.33 Overview on different diagnostics technologies and subsectors .....	239
Tab. 3.34 Diagnostics manufacturers and their FDA listed human gene tests .....	241
Tab. 3.35 Selected diagnostics manufacturers and their FDA listed microbial DNA tests.....	242
Tab. 3.36 Drugs for which a PGx test might make sense .....	245
Tab. 3.37 FDA listed companion diagnostics (CDx) to test mutation related drugs .....	248
Tab. 3.38 CDx-Tests from Roche (in development or on the market) .....	250
Tab. 3.39 vfa listed mandatory diagnostic tests for drug applications .....	251
Tab. 3.40 Biomarker based (personalized) medicine by numbers .....	253
Tab. 3.41 Basic chemicals produced by fermentation (organic acids) .....	259
Tab. 3.42 Cost effectiveness of biotechnological produced basic chemicals in dependance of the sugar price.....	264
Tab. 3.43 Selected biofuel companies (mainly 2G and up) .....	276
Tab. 3.44 Biotechnological produced amino acids.....	278
Tab. 3.45 Biotechnological produced vitamins .....	279
Tab. 3.46 Selected German companies with activities in white biotechnology.....	286
Tab. 3.47 Selected German small and medium sized white biotech companies .....	287
Tab. 3.48 Selected foreign companies with activities in white biotechnology .....	288
Tab. 3.49 Selected foreign small and medium sized white biotech companies.....	289
Tab. 3.50 Overview on sectors who support the economic application of biotechnology.....	298
Tab. 3.51 Selected companies with activities in genome editing .....	300
Tab. 4.1 Early companions of German molecular biology at the Institute for Genetics in Cologne .....	320
Tab. 4.2 Selected federal activities related to biotechnology, end of 1960ies to 1970ies .....	327
Tab. 4.3 Overview on so called gene centers, founded starting 1982 .....	332
Tab. 4.4 Selected federal activities related to biotechnology, 1980ies .....	335
Tab. 4.5 Selected federal activities related to biotechnology, 1990ies .....	339

Tab. 4.6 Comparison of key data of the VC markets in Germany and in the US, 1990 to 2000 .....	346
Tab. 4.7 Comparison of early biotech related frameworks in the US and Germany .....	350
Tab. 4.8 Key data of German and US.....	351
Tab. 4.9 Selected activities of German chemical and pharmaceutical companies in modern biology.....	352
Tab. 5.1 Milestones at Rentschler Biotechnology and its predecessor companies .....	369
Tab. 5.2 Selected German company foundations in the 1980ies, still active today .....	369
Tab. 5.3 Selected German company foundations in the 1 <sup>st</sup> half of the 1990ies, still active today .....	373
Tab. 5.4 Capital increases of German public biotech companies in the year 2004 .....	384
Tab. 5.5 Selected biotech VC financings in the years 2005 to 2007.....	389
Tab. 5.6 Top alliances of German biotech companies by potential value in the years 2005 to 2007 .....	391
Tab. 5.7 Selected top VC rounds of German biotech companies in the years 2007 to 2011.....	399
Tab. 5.8 Top alliances of German biotech companies by potential value in the years 2008 to 2011 .....	402
Tab. 5.9 Selected products from non-therapeutic sectors .....	407
Tab. 5.10 Top acquisitions of German biotech companies by value in the years 2008 to 2011.....	407
Tab. 5.11 The federal program healthcare research .....	414
Tab. 5.12 Selected BMBF programs for bioeconomy.....	415
Tab. 5.13 Federal initiatives related to biotechnological research and innovation .....	417
Tab. 5.14 Selected top VC rounds of German biotech companies in the years 2012 to 2014.....	424
Tab. 5.15 Capital increases of German public biotech companies in the years 2012 to 2014 .....	425
Tab. 5.16 Top alliances of German biotech companies since 2012 .....	428
Tab. 5.17 Selected German biotech companies with innovative therapeutic .....	429
Tab. 5.18 Selected key data on the biopharmaceutical industry in Germany .....	434
Tab. 5.19 Selected drug developing US biotech companies with >US\$bn 1 market cap (end of 2014) .....	436

# Die Biotechnologie-Industrie

Dieses Kompendium zur Biotechnologie-Industrie bietet eine fundierte Einführung und Übersicht zu einer Zukunfts- und Schlüsselbranche. Es informiert über die dahinter stehende Biotechnologie, beleuchtet Entstehung und Rahmenbedingungen der Industrie und stellt umfangreiches sowie aktuelles Zahlenmaterial zum Nachschlagen bereit. Neben der Analyse der US-Biotech-Industrie liegt ein besonderer Fokus auf der Situation in Deutschland.

## Aus dem Inhalt

- Biotechnologie – eine Einführung
- Biotech-Industrie von den Anfängen bis heute
- Anwendende Sektoren und Märkte
- Rahmenbedingungen bei der Entstehung der Biotech-Industrie in Deutschland
- Das Aufkommen einer KMU-geprägten Biotech-Industrie in Deutschland

## Die Zielgruppen

Das Buch ist als Einführungs-, Übersichts- und Nachschlagewerk für alle zu empfehlen, die einen fundierten Einblick in die Biotechnologie-Industrie erhalten möchten, wie z. B. Investoren, branchenfremde Unternehmer, Journalisten, Politiker und andere Interessierte. Für Branchenkenner bietet es eine Zusammenstellung aktueller Trends und Daten.

## Zur Autorin

**Dr. Julia Schüler** studierte Biologie und promovierte in Betriebswirtschaft bereits über ökonomische Aspekte der Biotechnologie. Seit mehr als 20 Jahren analysiert sie die Entwicklung der Biotechnologie-Industrie und war mehrfache Autorin des Deutschen Biotechnologie-Reports von Ernst & Young/EY. Heute arbeitet sie freiberuflich und führt unter anderem den Think-Tank BioMedServices.
